Education

Malla Reddy College of Engineering and Technology — Hyderabad, Telangana
Bachelor of Technology in Computer Science, CGPA (up to 7th semester): 8.72/10 — *Expected 2026*

Deeksha Junior College — Hyderabad, Telangana
Senior Secondary Education, CGPA: 8.76/10 — *2020 - 2022*

Experience

Full-Stack Developer Intern - Certificate | GitHub — February 2025 - March 2025
EY Global Delivery Services (EY GDS) — *Remote*

- Innovated a MERN-powered recipe-sharing platform using React, Express.js, Node.js, and MongoDB, delivering high-performance real-time creation, sharing, and user collaboration at scale. Optimized REST APIs and JWT-based authentication to reduce access latency and enhance the system reliability for 10+ concurrent users.

Artificial Intelligence Developer Intern - Certificate | GitHub — January 2025 - March 2025
Microsoft & SAP (CSR Initiative) - TechSaksham Program — *Remote*

- Pioneered a Streamlit-based Potato Leaf Disease Detection system using CNN + VGG16 Transfer Learning, achieving 92%+ multi-class accuracy, boosting diagnostic speed by 40% through accelerated preprocessing, confidence-scored outputs, and also streamlined high-precision inference to evaluate the early crop-protection decisions.

Deep Learning Developer Intern - Certificate | GitHub — October 2024 - December 2024
Infosys Springboard (Program Version 5.0) — *Remote*

- Devised and Manifested a DigitWise: Handwritten Digit Recognition using MLP, CNN, and LeNet-5 architectures, attaining 96.16% MNIST 71.6% CIFAR-10 accuracy with advanced augmentation and cross-dataset generalization.
- Streamlined preprocessing efficiency stability by 30% through custom data pipelines metric-driven optimization.

Projects

BackRise Nexus | GitHub → *JavaScript, React, Node.js, ExpressJS, MongoDB, Talend API, Razorpay, JWT Auth*

- Crafted a robust full-stack crowdfunding platform, enabling real-time messaging & onboarding 10+ users for rapid iterative testing and feedback, and leveraging campaign analytics to foster trust & boost user engagement.
- Elevated a secure, PCI-DSS compliant Stripe payment pipeline by implementing tokenized encryption and reliable adaptive failure recovery mechanisms to eliminate data exposure risks and boost transaction success rate by 25%.

FinCortex Engine | GitHub → *MySQL, SQLAlchemy ORM, SK-Learn, Plotly Dash, Pocketsphinx STT, Google API*

- Built an advanced Cognitive Financial Analytics system using Flask + MySQL + SQLAlchemy ORM, integrating pipelines, Dash dashboards, voice-controlled analytics, and automated Airflow to boost 35% response efficiency.
- Added Intelligent Voice-Query handling and instant recommendations to support personalized financial guidance.

EnviroClass AI | GitHub → *VGG16, ResNet50, InceptionV3, TensorFlow, PIL, CNN, Matplotlib, Flask, Google API*

- Trained and benchmarked a Reuse-Waste Classification system using VGG16, ResNet50, InceptionV3 on 8,300+ curated images across 8+ waste categories, achieving 90%+ accuracy through custom pre-processing & fine-tuning.
- Architected a Flask-based AI prediction application with real-time uploads and YouTube-powered recycling guidance.

GraftLuminex Intelligence | GitHub → *NLTK, SpaCy, Flask, Matplotlib, Scikit-learn, PyTorch, LSTM, JavaScript*

- Engineered an NLP-driven LSTM model to predict organ transplant success rate using data from 30+ patient records.
- Enhanced processing efficiency by 35%, refined model accuracy by 20% with advanced tokenization, ROC-AUC & other focused evaluation metrics, confidence-scores calibration, and opts real-time risk segmentation.

Technical Skills

Languages: Python, Java, JavaScript
AI/ML Technologies: Machine Learning, Explainable AI, Deep Learning, Computer Vision, NLP, Agentic AI
Frontend Technologies: HTML/CSS, Javascript, React.js, Tailwind CSS, Material-UI, Shadcn UI, UI/UX Design
Backend Technologies: Node.js, FastAPI, Flask OAuth, Express.js, Postman
Databases: SQLite Browser, MySQL, MongoDB, Cassandra DB

Certifications

- AWS Machine Learning Foundations & Cloud Foundations - **AWS Academy Graduate**
- Introduction to Large Language Models - **Google Cloud**
- Database Structures and Management with MySQL - **Meta**
